

# PRODUCT DATA SHEET

## M 8052 SILICON LUBRICANT OIL AND TEFLON

### PRODUCT DESCRIPTION

**M 8052 is a quality blend of silicone grease / teflon and dehydration equipment, which was founded by multi-component, providing extreme pressure lubrication. M 8052 is a non-conductive and highly resistant to corrosive materials such as salt water, acids, alkalis, steam, solvents and detergenum.**

**M 8052 A fine superficial layer, which is then slowly shrinks in contact with air and creates a uniform durable coating.**

### TYPICAL USE

**M 8052 is designed to protect heavily loaded parts such as brake linings from damage by snow, frost and road salt can also be used for falsification of external parts of electrical equipment, locks, door hinges and is perfect for moving parts of machinery, such as transport system (belt system, conveying system).**

**M 8052 is suitable for machines for food production and the textile industry.**

### BENEFITS

**M 8052 is easy to use, thanks to a very high pressure and temperature resistance from -50 ° C to +250 ° C. M 8052 has excellent adhesion to the components, is noncorrosive, nontoxic and safe food. M 8052 can be used for insulating electrical components.**

**Method of application** - can be applied by brush or roller.

### TYPICAL CHARACTERISTICS OF LUBRICANTS

Chemical Base: silicone grease, Teflon and oil derivatives

Appearance: Grease

Color: Amber

Odor: None

Density: 1.225

Solubility in water: miscible

Shelf life: 12 + months with proper storage conditions

**PACK** - 350g, 5 / 30 / 120 / 210 Kg. **STORAGE** - Keep away from children and from sources of ignition.

**HEALTH AND SAFETY** - Before use, read safety sheets. These values are average and not a specification.

Produced by: **HF SERVICE** Ltd. Plesnice 21, 330 33 City Tousek
